DETAILED ACTION

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

In Claim 15, line 3, please delete the words "pulp consistency information" and insert --a process signal-- therefor.

In first paragraph of the Specification after the title, as amended on 10/22/2003, please insert the following before the word "filed":
--now U.S. Patent No. 6,767,432, --.

Authorization for this examiner's amendment was given in a telephone interview with Brian Davidson on 2/1/2007.

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter: the nearest prior art, Reinhall (3682444), teaches pulp dewatering or thickening using a similar apparatus, but with a closed screw. An open screw configuration similar to that of the instant invention has been used previously in pulp treating to promote mixing and contact of pulp with a reactant, for example a bleaching agent, as taught by White et al (5863389). Mixing is not an objective of the instant invention, which claims

the formation of a thickened pulp an unthickened pulp in the same vessel, a situation that implies a low degree of mixing. The method of the instant invention is neither anticipated nor made obvious by dewatering methods of the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
